EXPERIENCE

Capital One

McLean, VA

Product Management Intern

June 2026 – Aug. 2026

- Driving **user research** for **Bank Statement modernization** on the EASE platform, translating customer pain points into product requirements for **self-service tools** targeting **\$10M in operational savings** by 2027.
- Defining **UI, data availability, and API integration requirements** across **2 sprint teams** to replace static PDF delivery with real-time statement access for **20M+ monthly customers** across checking and savings products.
- Conducting **competitive analysis** of peer digital banking statement experiences to benchmark self-service capabilities, surfacing feature gaps that directly inform product strategy and roadmap for the **EASE platform** redesign.
- Designing **phased rollout strategy** and risk mitigation framework; presenting user needs, business value, and end-to-end system design to **Retail Bank Product** and Account Servicing leadership to drive stakeholder alignment.

Kite and Key Partners

Detroit, MI

Product Consultant

Jan. 2026 – May 2026

- Expanded scope from a single LLM-generated analysis to an **end-to-end automated AI workflow** evaluating **16 concurrent state healthcare bills**, incorporating input from Carrie Rheingans, **IHPI faculty**, and advocacy groups.
- Delivered proof-of-concept and co-authored a **research paper** on LLM-driven Economic Impact Analyses, establishing a **scalable automation process** that compresses analysis timelines from weeks to hours and democratizes access.

Center for Healthcare Engineering & Patient Safety

Ann Arbor, MI

Operations Consultant

Aug. 2025 – Apr. 2026

- Partnered with Michigan Medicine's **Chief Transformation Officer** to model **end-to-end patient flow**, prioritizing initiatives across a **\$50M capital portfolio** using throughput, cycle time, and utilization metrics to surface bottlenecks.
- Developed **cost-impact and capacity uplift models** to compare process improvement scenarios, enabling **data-driven** capital investment prioritization by balancing efficiency gains, scalability, implementation risk, and ROI.
- Engineered **20+ Python scripts** to extract and clean scheduling data from **Epic EHR**, analyzing utilization rates across Rapid Access, New Patient Urgent (NPU), and New Onset Seizure (NOS) pediatric neurology slots.
- Redesigned **pediatric neurology scheduling logic** with 3 clinicians, dynamically reallocating unfilled Rapid Access blocks to non-ED NOS patients to eliminate chronic slot underutilization and improve care access equity.

The Chemours Company

Wilmington, DE

Business Intelligence Intern

May 2025 – Aug. 2025

- Designed and deployed **6 automated Power BI dashboards** integrating **1M+ rows** of global TiO₂ import/export data, surfacing real-time supply chain and commercial KPIs across global business and operations stakeholders.
- Established **KPI definitions and MTBF analytics** for critical TiO₂ manufacturing assets, enabling predictive maintenance tracking and surfacing equipment reliability signals for operations leadership across production facilities.
- Led enablement sessions for **20+ supply chain and commercial users** to drive **self-service analytics adoption**, reducing manual reporting cycle times from **4 days to under 8 hours** and freeing capacity for higher-value analysis.

National Institute of Standards and Technology (NIST)

Gaithersburg, MD

Software Engineering Intern

May 2024 – Aug. 2024

- Architected an **automated pipeline** for the **PFHub community** processing **500+ GB** across **8 simulation types and 27+ benchmark variations**, defining a **FAIR-compliant metadata standard** to eliminate data curation.
- Translated simulation workflows into **stakeholder-facing product roadmaps**, partnering with RO-Crate developers to address gaps in tabular data semantics and contribute **standardized documentation practices** to the specification.

EDUCATION

University of Michigan – Ann Arbor

Ann Arbor, MI

BSE in Computer Science

Expected Dec. 2026

- Notable Coursework: Project Management and Consulting, UI/UX, Networks, Databases, Distributed Systems, Integrated Product Development, Conversational AI, Linear Programming

ADDITIONAL INFORMATION

Technical Skills: Python, SQL, AWS, Microsoft Azure, Figma, Power BI (Certified), Agile/Scrum, Jira

Campus Involvement: Pops Orchestra (Principal Violist), Chamber Ensemble, Zeta Pi Technical Fraternity
