EXPERIENCE

Capital One

McLean, VA

Product Management Intern

June 2026 – Aug. 2026

- Led cross-functional **user research** for Bank Statement modernization on the EASE platform, translating customer pain points into prioritized **PRDs** for self-service tools targeting **\$10M** in annual operational savings.
- Defined **UI, data-availability, and API requirements** across 2 sprint teams to replace static PDF delivery with real-time, on-demand statement access for **20M+** monthly checking and savings customers.
- Ran **competitive analysis** of peer digital-banking statement experiences to benchmark self-service capabilities, surfacing feature gaps that directly informed **product strategy** and the EASE platform redesign roadmap.
- Designed a phased **rollout and risk-mitigation framework**, presenting user needs, business value, and end-to-end system design to Retail Bank Product and Account Servicing leadership to drive stakeholder alignment.

Center for Healthcare Engineering & Patient Safety

Ann Arbor, MI

Operations Consultant

Aug. 2025 – Apr. 2026

- Partnered with Michigan Medicine's **Chief Transformation Officer** to model end-to-end patient flow, prioritizing a **\$50M** capital portfolio using throughput, cycle-time, and utilization metrics to surface bottlenecks.
- Built **cost-impact and capacity-uplift models** to compare process-improvement scenarios, enabling data-driven capital investment prioritization by balancing efficiency gains, scalability, implementation risk, and ROI.
- Engineered **20+ Python scripts** on **Epic EHR** scheduling data and redesigned pediatric neurology logic with 3 clinicians, reallocating unfilled Rapid Access blocks to NOS patients to improve **care-access equity**.

The Chemours Company

Wilmington, DE

Business Intelligence Intern

May 2025 – Aug. 2025

- Designed and deployed **6 automated Power BI dashboards** integrating **1M+ rows** of global TiO2 import/export data, surfacing real-time supply-chain and commercial **KPIs** across global business and operations.
- Led enablement sessions for **20+** supply-chain and commercial users to drive self-service analytics adoption, cutting manual reporting cycles from **4 days to under 8 hours** and freeing capacity for higher-value analysis.

National Institute of Standards and Technology (NIST)

Gaithersburg, MD

Software Engineering Intern

May 2024 – Aug. 2024

- Architected an automated **data pipeline** for PFHub processing **500+ GB** across 8 simulation types and 27+ benchmarks, defining a **FAIR-compliant metadata standard** to eliminate manual curation.
- Translated simulation workflows into stakeholder-facing **product roadmaps**, partnering with RO-Crate developers to address tabular-data semantics gaps and contribute standardized documentation to the specification.

PROJECTS

Agentic AI Workflow for Economic Impact Analysis | Kite & Key Partners

Jan. 2026 – May 2026

- Built an **end-to-end agentic AI workflow** that autonomously researches, analyzes, and drafts economic impact analyses for **16 concurrent** state healthcare bills, replacing a manual single-analysis process.
- Defined requirements with IHPI faculty, delivered a **proof-of-concept** compressing analysis timelines **from weeks to hours**, and co-authored a research paper on **LLM-driven** economic impact analysis that democratizes access.

Hybrid Forecasting Model for Day-Ahead Electricity Prices (CAISO) | ElectricFish

Aug. 2025 – Dec. 2025

- Built a **3-stage hybrid ML pipeline** on **Azure ML Studio** (XGBoost baseline, LGBM spike classifier, NGBoost uncertainty) to forecast **CAISO day-ahead electricity prices** across **10 California cities**.
- Validated on **3 years** of CAISO LMP, weather, and holiday data through an **80/20** time-series split, hitting every threshold: **$R^2 > 0.9$, RMSE < 10, sMAPE < 25** across all validation cities and pricing zones.

EDUCATION

University of Michigan – Ann Arbor

Ann Arbor, MI

BSE in Computer Science

Expected Dec. 2026

- **Notable Coursework:** Project Management & Consulting, UI/UX, Networks, Databases, Distributed Systems, Integrated Product Development, Conversational AI, Linear Programming

SKILLS

Product: User Research, Competitive Analysis, PRDs, Roadmapping, Agile/Scrum, Stakeholder Management

Technical: Python, SQL, AWS, Microsoft Azure, Azure ML Studio, GitHub Copilot, Machine Learning, Data Pipelines

Tools: Figma, Power BI (Certified), Jira

Campus Involvement: Pops Orchestra (Principal Violist), Chamber Ensemble, Zeta Pi Technical Fraternity
