SUMMARY

Technical Product Manager with experience across **SDLC, API integration, PRDs, roadmapping, go-to-market, OKRs, prioritization, risk mitigation, cross-functional collaboration** — driving **product strategy** from discovery to delivery.

EXPERIENCE

Capital One

McLean, VA

Technical Product Management Intern (TPM)

June 2026 – Aug. 2026

- Defined **UI, data-availability, and API requirements** across 2 sprint teams — leading **sprint planning and backlog grooming** — to launch **2 self-service banking products** serving **20M+** customers.
- Authored **PRDs** and **technical specifications** for Bank Statement modernization on the EASE platform, translating system constraints into sprint-ready requirements targeting **\$10M** in savings and **projected call volume reduction**.
- Designed a phased **launch** and risk-mitigation framework covering **milestone planning**, dependency mapping, and **execution planning** to drive **stakeholder alignment** with Retail Bank Product and **Account Servicing leadership**.
- Ran **competitive analysis** of peer digital-banking statement experiences across **4 key dimensions**, surfacing feature gaps that directly informed **product roadmap** prioritization and **go-forward product strategy** for the EASE redesign.

Center for Healthcare Engineering & Patient Safety

Ann Arbor, MI

Product & Operations Research Assistant

Aug. 2025 – Apr. 2026

- Partnered with Michigan Medicine's **Chief Transformation Officer** to model end-to-end patient flow across **inpatient and outpatient workflows** and prioritize a **\$50M** capital portfolio using throughput and utilization metrics.
- Built **cost-impact and capacity-uplift models** to evaluate process-improvement scenarios, enabling data-driven prioritization across efficiency, scalability, and ROI to **inform the team's highest-impact strategic decisions**.
- Shipped **20+ Python automation scripts** after defining requirements with 3 clinicians on **Epic EHR** scheduling data, redesigning pediatric neurology clinic logic to improve **care-access equity** for **walk-in patients**.

The Chemours Company

Wilmington, DE

Business Intelligence Intern

May 2025 – Aug. 2025

- Established **data requirements** and reporting schemas with supply-chain and operations stakeholders, cutting manual reporting cycles from **4 days to under 8 hours**, enabling self-service analytics **across global and domestic teams**.
- Led end-to-end delivery of **6 automated Power BI dashboards** integrating **1M+** rows of global TiO2 import/export data across **ETL pipelines** to surface real-time supply-chain **KPIs** across **5 global manufacturing plants** worldwide.

National Institute of Standards and Technology (NIST)

Gaithersburg, MD

Software Engineering Intern

May 2024 – Aug. 2024

- Owned the **product roadmap** for a data pipeline processing **500+ GB** across 27+ benchmarks; defined ingestion requirements, a **metadata schema standard**, and **API data contracts** with developers, eliminating manual curation.
- Presented end-of-summer findings to **40 cross-disciplinary PhD scientists** and interns, translating complex pipeline architecture into accessible insights for a **non-technical audience** and earning buy-in for continued development.

PROJECTS

Agentic AI Workflow for Economic Impact Analysis | *Kite & Key Partners*

Jan. 2026 – May 2026

- Architected and defined requirements for an **end-to-end agentic AI system** that autonomously researches and drafts economic impact analyses for **16 concurrent** state healthcare bills, entirely replacing a **manual single-analysis process**.
- Delivered a **proof-of-concept** compressing analysis timelines **from weeks to hours**; co-authored a research paper on **LLM-driven** economic analysis validating technical feasibility with IHPI faculty and **opening policy access at scale**.

Day-Ahead Electricity Price Forecasting Product | *ElectricFish*

Aug. 2025 – Dec. 2025

- Scoped and built a **3-stage hybrid ML pipeline** on **Azure ML Studio** to forecast **CAISO day-ahead electricity prices** across **10 California cities**, enabling engineers to implement a **dynamic pricing strategy** for EV stations.
- Validated against **3 years** of CAISO data via an **80/20** time-series split, hitting every threshold: **$R^2 > 0.9$** , **RMSE < 10**, **sMAPE < 25** across cities, pricing zones, and **peak load periods**, meeting **client acceptance criteria**.

EDUCATION

University of Michigan – Ann Arbor

Ann Arbor, MI

BSE in Computer Science

Expected Dec. 2026

- Notable Coursework:** Integrated Product Development, Project Management & Consulting, UI/UX, Conversational AI, Distributed Systems, Databases, Networks, Linear Programming

SKILLS

TPM: User Stories, Technical Specifications, API Requirements, System Design, Agile/Scrum, Stakeholder Management

Technical: Python, SQL, Data Pipelines, Integration, Microsoft Azure, Azure ML Studio, Claude Code

Tools: Jira, Figma, Confluence, Power BI (Certified)

Campus Involvement: Pops Orchestra (Principal Violist), Chamber Ensemble, Zeta Pi Technical Fraternity
